“In a social phase in which thinking about one’s garden has become the rule, the virus sends us a clear message: the only way out is reciprocity, the sense of belonging, the community, the feeling of being part of something greater to take care of us and that can take care of us. The shared responsibility, the feeling that your fates depends on not only yours but on everyone around you. And that you depend on them.” - Francesca Morelli

KEEP ON SCROLLING to resources below  … it is a long list, but somewhat organized …;-)
